

S型防滑地垫 / 圈丝地垫

是一种通常由耐用材料如PVC或橡胶制成的地垫类型，被设计成卷曲或环状图案，有助于捕捉污垢、碎片和湿气，防止其被带到地面上。

圈丝地垫被广泛应用于工业和商业环境入口处和需要耐用易清洁地面的室外区域。卷曲的图案使鞋子容易刮去污垢和湿气，确保它们在进入空间之前被有效地清除。

圈丝地垫因其被广泛应用于各种地面环境，用来保持清洁、增强安全性并延长地材表面使用寿命的能力而备受欢迎。

S Mats / Coil Mats

known as coil floor mats are a type of floor mat typically made from durable materials like PVC or rubber. They are designed with a coil or looped pattern that helps to trap dirt, debris, and moisture, keeping it from being tracked onto the floor.

These mats are commonly used in industrial and commercial settings, entryways, and outdoor areas where there's a need for durable, easy-to-clean flooring. The coil pattern allows for easy scraping of shoes, ensuring that dirt and moisture are effectively removed before entering a space.

Coil mats are valued for their ability to maintain cleanliness, enhance safety, and prolong the lifespan of flooring surfaces in a wide range of applications.
